ESHWAR GAJULA

Email: eshwargajula31@gmail.com | **Phone**: +91-8639470630 |Hyderabad, India
GitHub: https://github.com/eshwar-gajula | **LinkedIn:** https://linkedin.com/in/gajula-eshwar |**Portfolio:** eshwar.xyz

PROFESSIONAL SUMMARY

Computer Science graduate focused on AI, cybersecurity, and intelligent automation, with a passion for building secure and innovative systems. Currently developing the ECHA ecosystem, combining AI-driven engineering with security-focused automation.

TECHNICAL SKILLS

- **Programming Languages:** Python, TypeScript, JavaScript, C#, Rust, Java, Bash/Shell
- **Web Technologies:** HTML5, CSS3, React, Vite, Flask, REST APIs, JSON
- **AI/ML:** Hugging Face Transformers, PEFT, BitsAndBytes, Accelerate, TensorFlow, Pandas, NumPy, Gradio
- **AI & LLM Tools:** Ollama, Qwen 2.5 Coder, OpenAI SDK, OmniRoute, Prompt Engineering, Tool Calling
- **Cybersecurity:** OWASP Top 10, Secure Code Review, Vulnerability Assessment, SAST/DAST, Nmap, Network Scanning
- **Systems & Networking:** Linux/Unix, TCP/IP, HTTP/HTTPS, DNS, Virtual Machines, Server Configuration
- **Databases:** MySQL, SQLite
- **Desktop & Application Development:** Tauri
- **Cloud, Deployment & Development Tools:** Vercel, Google Colab, Git, GitHub
- **Automation & Engineering:** CI/CD, Tool Registry Architecture, Agent–Tool Orchestration, Filesystem Automation, Terminal Automation, Audit & Verification

WORK EXPERIENCE

Web Designer Intern| *Nation Innovation (Feb 2025 – Oct 2025)*

- **Secure Web Architecture:** Engineered the official website using Wix Studio and custom JavaScript, implementing **secure navigation** protocols and optimizing user experience.
- **Performance Optimization:** Developed dynamic sections and interactive animations, improving user engagement by **35%** while maintaining strict code quality and cross-browser compatibility.

PROJECTS

ECHA Agent — Autonomous Engineering & Security Agent | Current Working Project

- **Tech Stack:** TypeScript, OpenAI SDK, OmniRoute, Ollama, Qwen 2.5 Coder 7B
- Building ECHA Agent, a TypeScript-based autonomous AI system powered by OmniRoute, Ollama, and Qwen 2.5 Coder 7B for intelligent planning, tool orchestration, and local task execution.
- Engineering a secure, controlled automation layer integrating Tool Registry, permissions, memory, auditing, verification, ECHA Shell, and security workflows into a unified platform.

ECHA Shell — Modular Desktop Environment | GitHub

- **Tech Stack:** Tauri, React, TypeScript, Rust, Vite
- Currently developing a modular desktop application serving as the primary interface for the ECHA ecosystem.
- Building reusable interfaces for automation workflows, security tools, system utilities, and agent-driven operations.
- Designing integration with ECHA Agent for centralized tool execution and intelligent automation.

Automated Network Vulnerability Scanner (Python-Based Security Tool)

- **Tech Stack:** Python, Socket Programming, Nmap, Requests, Linux
- Developed a security assessment tool for host discovery, port scanning, service enumeration, and vulnerability analysis.
- Automated network reconnaissance workflows across authorized target environments.
- Designing integration with ECHA Agent for reconnaissance, result analysis, and security reporting.

Web Security Reconnaissance Tool

- **Tech Stack:** Python, Requests, DNS, HTTP/HTTPS, Linux
- Developed a modular reconnaissance workflow for collecting **DNS, HTTP, technology, and endpoint information**.
- Automated reconnaissance results into structured **JSON output** for security analysis.
- Designed as an extensible foundation for **ECHA security automation**.

EDUCATION

Bachelor of Technology in Computer Science & Engineering
SVS Group of Institutions, Warangal | 2020 - 2024
